DETAILED ACTION

The Amendment B filed 30 December 2002 has been received, entered into the record and carefully considered. The following information provided in the amendment affects the instant application:

1. Claims 1-11 have been cancelled.
 2. New Claims 12-17 have been added.
 3. Remarks drawn to rejections under 35 U.S.C. 112 second paragraph 35 USC 103 and obviousness type double patenting rejection.
 4. Declaration under Rule 132.
- Claims 12-17 are pending.

Double Patenting

The obviousness type double patenting rejection of instant Claim 11 against Claims 1-4 of copending application 09/830761 has been obviated by cancellation of instant claim 11.

Claim Objections

Claim 12 is objected to because of the following informalities: The terms carboxy and desulphated are misspelled. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 recites the terms “by various properties and physical shapes”. The terms are vague and in the absence of said various properties and shapes, claim 17 is indefinite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Newly added Claims 12-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Della Valle et al (USPN 5,676,964) in combination with Qin (EP 0566118) and Conti et al (USPN 4,810,695) for reasons of record claims 1-11 were rejected over the same prior art.

Applicants arguments have been considered carefully but is not found persuasive.

Applicants argue that based on their comparative experiment performed that on carboxymethyl celluloses using diamines and polyamines using the method of Qin (EP 0566118A1) produces only mixed crosslinked derivatives are formed and not pure crosslinked

Art Unit: 1623

polysaccharides. By pure crosslinked polysaccharides it is taken to mean purely amidic crosslinked. Instant claim 12 recites a process for preparing crosslinked polysaccharides containing carboxy groups via the reaction of the carboxy activated polysaccharide with a polyamine. The recitation of claim 1 does not exclude cross links other than amidic cross links. A patentable distinction is not seen in Claim 12.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
